
Andrej Karpathy Research Report

A structured, source-backed project report with background context, recent developments, analysis, and references.

Prepared On	13 June 2026
Primary Topic	Andrej Karpathy
Sources Used	9
Report Type	Automated research brief for project use

Note: This report is generated from publicly available web sources. Review references before using it for formal submission.

Contents

1. Executive Summary
2. Research Scope And Method
3. Background And Context
4. Current Developments
5. Source-Based Analysis
6. Conclusion
7. References

Chapter 1

Executive Summary

Andrej Karpathy (born 23 October 1986) is a Slovak-Canadian AI researcher, who co-founded and formerly worked at OpenAI, where he specialized in deep learning and computer vision. He also worked as the director of artificial intelligence and Autopilot Vision at Tesla, and in 2024 he founded Eureka Labs, an AI education platform. In 2026 he joined Anthropic as part of the pretraining team.

- The report uses 3 background section(s) and 8 recent news item(s).
- Important recurring terms found in the collected material include: karpathy, anthropic, openai, team, tesla, what.
- Detailed article text is included where publisher pages allowed extraction.

Chapter 2

Research Scope And Method

The report is assembled from live web sources at generation time. Wikipedia is used for baseline background, while Google News RSS is used to identify recent coverage. For each news item, the generator attempts to fetch and extract readable paragraph text from the publisher page.

Source Area	Collection Result
Wikipedia	https://en.wikipedia.org/wiki/Andrej_Karpathy
News	8 item(s) collected from Google News RSS.
Article Text	6 item(s) contained extractable publisher article text.

Chapter 3

Background And Context

Reference source: https://en.wikipedia.org/wiki/Andrej_Karpathy

Education and early life

Karpathy was born in Bratislava, Czechoslovakia (now Slovakia), and moved with his family to Toronto when he was 15. He completed his Computer Science and Physics bachelor's degrees at University of Toronto in 2009 and his master's degree at University of British Columbia in 2011, where he worked on physically simulated figures (for example, a simulated runner or a simulated person in a crowd) with his adviser Michiel van de Panne. In 2006, Karpathy began posting videos on YouTube on his channel, badmephisto. He garnered fame by posting Rubik's cube tutorials which have been used by famous speedcubers such as Feliks Zemdeg. The channel has over 9 million views as of June 2025. Karpathy received a PhD from Stanford University in 2015 under the supervision of Fei-Fei Li, focusing on the intersection of natural language processing and computer vision, and deep learning models suited for this task.

Career and research

He authored and was the primary instructor of the first deep learning course at Stanford, CS 231n: Convolutional Neural Networks for Visual Recognition. The course became one of the largest classes at Stanford, growing from 150 students in 2015 to 750 in 2017. Karpathy is a founding member of the artificial intelligence research group OpenAI, where he was a research scientist from 2015 to 2017. In June 2017 he became Tesla's director of artificial intelligence and reported to Elon Musk. He was named one of MIT Technology Review's Innovators Under 35 for 2020. After taking a several-months-long sabbatical from Tesla, he announced he was leaving the company in July 2022. As of February 2023, he makes YouTube videos on how to create artificial neural networks. On February 9, 2023, Karpathy announced he was returning to OpenAI. A year later on February 13, 2024, an OpenAI spokesperson confirmed that Karpathy had left OpenAI.

In the same year, he was named one of Time Magazine's 100 Most Influential People in AI. On July 16, 2024, Karpathy announced on his X account that he started a new AI education company called Eureka Labs. Their first product was the AI course, LLM101n. He also has a broader educational effort, the "Zero to Hero" series on LLM fundamentals. The company also advocates for AI teaching assistants, a concept which has been criticized due to data privacy concerns and the removal of personal connection between teacher and student. In February 2025, Karpathy coined the term vibe coding to describe a way of building software where you describe what you want in plain language, let an LLM generate the code, and iterate from there rather than writing code by hand. The term moved fast: Merriam-Webster added it as a "slang & trending" expression in March 2025, and Collins named it Word of the Year for 2025.

The idea built on something Karpathy had said in 2023 -- that "the hottest new programming language is English" -- suggesting developers would increasingly direct computers in natural language rather than code. By early 2025, Y Combinator reported that 25% of startups in its Winter batch had codebases that were 95% AI-generated. On May 19, 2026, he announced that he joined Anthropic via a statement on X, while the company stated that he will be leading a team for research in pretraining.

Chapter 4

Current Developments

1. Is Vibe Coding Already Dead? Even Karpathy Is Moving On - Forbes

Forbes | 2026-06-12

Article text extracted.

Source: <https://www.forbes.com/sites/jodiecook/2026/06/12/is-vibe-coding-already-dead-even-karpathy-is-moving-on/>

Detailed Summary

Andrej Karpathy, who coined "vibe coding," now deems it obsolete, advocating for "agentic engineering" after joining Anthropic. Andrej Karpathy gave vibe coding its name in February 2025 . He calls it agentic engineering. Agentic engineering is the next layer up. The model is the bottleneck on what an agent can do.

Key Points From The Article

- Andrej Karpathy gave vibe coding its name in February 2025 .

- He calls it agentic engineering.
- Agentic engineering is the next layer up.
- The model is the bottleneck on what an agent can do.

2. OpenAI co-founder Andrej Karpathy joins Anthropic's pre-training team - TechCrunch

TechCrunch | 2026-05-19

Article text extracted.

Source: <https://techcrunch.com/2026/05/19/openai-co-founder-andrej-karpathy-joins-anthropics-pre-training-team/>

Detailed Summary

Andrej Karpathy, the AI researcher who co-founded and formerly worked at OpenAI and previously led AI at Tesla, has joined Anthropic. "I've joined Anthropic," Karpathy posted on X Tuesday. "I think the next few years at the frontier of LLMs will be especially formative. I am very excited to join the team here and get back to R&D." Personal update: I've joined Anthropic. I think the next few years at the frontier of LLMs will be especially formative. I am very excited to join the team here and get back to R&D. An Anthropic spokesperson told TechCrunch that Karpathy will start a team focused on using Claude to accelerate pre-training research.

Key Points From The Article

- Andrej Karpathy, the AI researcher who co-founded and formerly worked at OpenAI and previously led AI at Tesla, has joined Anthropic. "I've joined Anthropic," Karpathy posted on X Tuesday. "I think the next few years at the frontier of LLMs will be especially formative.
- I am very excited to join the team here and get back to R&D." Personal update: I've joined Anthropic.
- I am very excited to join the team here and get back to R&D.
- An Anthropic spokesperson told TechCrunch that Karpathy will start a team focused on using Claude to accelerate pre-training research.

3. Andrej Karpathy, OpenAI founding member and inventor of 'vibe coding,' defects to Anthropic - Fortune

Fortune | 2026-05-19

Article text extracted.

Source: <https://fortune.com/2026/05/19/who-is-andrej-karpathy-vibe-coding-anthropic-openai-rubiks-cube/>

Detailed Summary

Anthropic can't seem to stop winning. After a string of blockbuster model releases, a new funding round reportedly in talks at a valuation approaching \$1 trillion, and an annual run rate that's nearly parabolic, it has now hired one of OpenAI's—its bitter competitor—most famous alumni. "Personal update: I've joined Anthropic," Andrej Karpathy wrote on X on Tuesday, in a post that drew nearly 3 million views within one hour. The decision suggests that Karpathy, whose writing on AI is followed by nearly 2 million people on X, has decided to put his stake in the AI race. The model he cited in that original tweet was Anthropic's. As an Anthropic employee, Karpathy will be building on the work from another viral post.

Key Points From The Article

- Anthropic can't seem to stop winning.
- After a string of blockbuster model releases, a new funding round reportedly in talks at a valuation approaching \$1 trillion, and an annual run rate that's nearly parabolic, it has now hired one of OpenAI's—its bitter competitor—most famous alumni. “Personal update: I’ve joined Anthropic,” Andrej Karpathy wrote on X on Tuesday, in a post that drew nearly 3 million views within one hour.
- The decision suggests that Karpathy, whose writing on AI is followed by nearly 2 million people on X, has decided to put his stake in the AI race.
- As an Anthropic employee, Karpathy will be building on the work from another viral post.

4. OpenAI Founding Member Andrej Karpathy Takes Role at Anthropic - Bloomberg.com

Bloomberg.com | 2026-05-19

Article text extracted.

Source:

<https://www.bloomberg.com/news/articles/2026-05-19/openai-founding-member-andrej-karpathy-takes-role-at-anthropic>

Detailed Summary

Andrej Karpathy , a founding member of OpenAI who later went to work for Tesla Inc. , has joined Anthropic PBC to do research and development focused on helping train new artificial intelligence models. Karpathy, a prominent figure in the artificial intelligence industry, previously helped lead the team behind Tesla's Autopilot system before returning to OpenAI. He left the ChatGPT maker for a second time last year and launched a startup focused on AI and education.

Key Points From The Article

- Andrej Karpathy , a founding member of OpenAI who later went to work for Tesla Inc. , has joined Anthropic PBC to do research and development focused on helping train new artificial intelligence models.
- Karpathy, a prominent figure in the artificial intelligence industry, previously helped lead the team behind Tesla's Autopilot system before returning to OpenAI.
- He left the ChatGPT maker for a second time last year and launched a startup focused on AI and education.

7. Anthropic hires OpenAI co-founder Andrej Karpathy, former Tesla AI leader - CNBC

CNBC | 2026-05-19

Article text extracted.

Source: <https://www.cnbc.com/2026/05/19/anthropic-hires-openai-cofounder-andrej-karpathy-former-tesla-ai-lead.html>

Detailed Summary

After helping to start OpenAI, Karpathy left for Tesla in 2017 to serve as director of AI. Musk recruited Karpathy away from OpenAI while the Tesla CEO was a board member at both tech companies. Karpathy's work at OpenAI and Tesla came up repeatedly during the Musk v. Karpathy was one of several OpenAI employees Musk borrowed from OpenAI to do months of free work at Tesla , where the development of self-driving vehicles wasn't going as quickly as promised. Karpathy holds a PhD in computer science from Stanford.

Key Points From The Article

- After helping to start OpenAI, Karpathy left for Tesla in 2017 to serve as director of AI.
- Musk recruited Karpathy away from OpenAI while the Tesla CEO was a board member at both tech companies.
- Karpathy's work at OpenAI and Tesla came up repeatedly during the Musk v.
- Karpathy holds a PhD in computer science from Stanford.

8. Andrej Karpathy's move to Anthropic is a major win for the AI giant in the talent wars - Business Insider

Business Insider | 2026-05-19

Article text extracted.

Source: <https://www.businessinsider.com/anthropic-hires-andrej-karpathy-2026-5>

Detailed Summary

Andrej Karpathy, the OpenAI founding member who was formerly Tesla's AI boss, announced on Tuesday that he had joined Anthropic.

Key Points From The Article

- Andrej Karpathy, the OpenAI founding member who was formerly Tesla's AI boss, announced on Tuesday that he had joined Anthropic.

Chapter 5

Source-Based Analysis

Main Themes

- Karpathy
- Anthropic
- Openai
- Team
- Tesla
- What
- Coding
- Code
- Vibe
- Will

Observations

- The background source provides a reference foundation for Andrej Karpathy, including 3 structured section(s).
- Recent coverage adds current context through 8 news item(s), with detailed article text extracted for 6 item(s).
- The collected material repeatedly emphasizes karpathy, anthropic, openai, team, tesla, making these useful areas for project discussion.
- Use the references section to verify every important claim before final academic, business, or client submission.

Limitations

- Some publisher sites block automated article extraction, so the report may use RSS summaries for those items.
- The report is extractive and source-backed; it does not replace expert review or original research.
- News coverage changes over time, so regenerate the report when current information is important.

Chapter 6

Conclusion

Andrej Karpathy (born 23 October 1986) is a Slovak-Canadian AI researcher, who co-founded and formerly worked at OpenAI, where he specialized in deep learning and computer vision.

He also worked as the director of artificial intelligence and Autopilot Vision at Tesla, and in 2024 he founded Eureka Labs, an AI education platform.

Recent coverage reviewed for this report includes: Is Vibe Coding Already Dead? Even Karpathy Is Moving On - Forbes; OpenAI co-founder Andrej Karpathy joins Anthropic's pre-training team - TechCrunch; Andrej Karpathy, OpenAI founding member and inventor of 'vibe coding,' defects to Anthropic - Fortune.

For project use, the strongest next step is to convert the themes, background facts, and current developments into your own argument, supported by the references listed below.
